RAM

# ONE TOOL IS DESIGNED TO MASTER EVERY JOB OUT THERE.

# 5.7L HEMI<sup>°</sup> V8 22 MPG HWY<sup>°</sup> 395 HORSEPOWER 410 LB-FT OF TORQUE

**5**<sub>YEAR</sub>/**60**,000<sub>MILE<sup>11</sup></sub> Come to work with the credentials of the available 5.7L HEMI V8, **POWENTRAIN LIMITED WARRANTY** and you're ready to take on whatever is in front of you, and—given the uncompromising towing and payload numbers—that loaded trailer or full-sized boat behind you. With advantages like Variable Valve Timing (VVT), the ingenious Multi-Displacement System (seamlessly transforming this robust V8 into a fuel-sipping four-cylinder when cruising) and the efficient power of its hemispherical heads, the HEMI V8 stands out—and frequently stands above.

# SHORT OR LONG, YOU'RE IN CONTROL.

# TOWING, HANDLING AND MANEUVERABILITY: WELCOME TO ELECTRONIC STABILITY CONTROL:4

Drive a 2016 Ram I500, where road manners, comfort and capability all ride hand in hand with safety and security. The indispensable Electronic Stability Control (ESC)<sup>[4]</sup> System (standard on every model) is key.

This comprehensive and state-of-the-art system addresses multiple dynamics using technology that enhances control—especially while towing. The Ram I500 ESC<sup>[4]</sup> System features these fundamental assets:

**All-Speed Traction Control** helps regulate wheel spin. If slippage occurs during acceleration, automatic throttle control will reduce torque; in extremes (like accelerating from pavement to ice), it will apply the brakes and reduce the engine power to maintain control.

**Trailer Sway Damping**<sup>[4]</sup> detects yaw and applies selective brake pressure on the tow vehicle's opposite side to counteract and reduce the sway.

# ESC<sup>[4]</sup>: TAKING BRAKING TO THE EXTREME.

The Ram 1500 braking system features optimized pedal travel to provide quick power assist. Rear wheel-speed sensors are positioned for protection against road elements. In its role as critical control system, ESC<sup>[4]</sup> features multiple assets for braking; it even includes vehicle control when stationary. These encompass:

Antilock Brake System (ABS). Monitoring each wheel's speed, the Ram I500 ABS design also incorporates back-up braking should one of the two braking circuits be compromised.

**Electronic Brake-Force Distribution** regulates brake pressure from front to rear to minimize stopping distances.

**Ready Alert Braking** senses the moment when the driver's foot is lifted from the accelerator; it applies an imperceptible brake force to ensure that pads and discs are lined up should an emergency stop be required.

**Rain Brake Support** automatically and seamlessly activates when the driver turns on the windshield wipers; all brake calipers gently pulse against their respective rotors to remove water from the pads.

**Hydraulic Boost Compensation.** Should a failure occur in the vacuum brake booster or any related line (e.g., a rupture from tough off-roading), the brake controller will run the ABS pump; our system is so sophisticated, it conveys the problem to the driver. Most important, the brakes perform as normal until the failure is serviced.

**Hill Start Assist.** When the vehicle is angled on hills or inclines, this system keeps your Ram I500 stationary for two seconds after the brakes have been released or until the accelerator is depressed.

# INTELLGENT PARKING.

# PARKSENSE® FRONT AND REAR PARK ASSIST.<sup>[5]</sup>

The available ParkSense Front and Rear Park Assist  $^{\rm (5)}$  serves as a convenient aid, especially when parallel parking.

Multiple integrated sensors use ultrasonic waves to detect objects as far as 47 inches away from the bumpers, picking up the echo of a signal when it bounces off an object. Using classic echo triangulation, the system determines relative distance. Read-outs located in the gauge cluster display team up with audible chimes to notify the driver of proximity to front and/or rear objects.

# CAPABILITY + COMFORT.

# THE MULTILINK COIL SPRING REAR SUSPENSION.

Class-exclusive<sup>[6]</sup>: a robust, dynamic rear suspension that simultaneously delivers occupant comfort with seriously impressive handling and road manners.

# **BEAKNOW-IT-ALL.** FROM TRAIL TO TRAILER, YOU'RE GOOD TO GO.

AVAILABLE PARKVIEW® REAR BACK-UP CAMERA<sup>[5]</sup> Approach your camper or trailer with total confidence, and without a spotter or having to jump out of the cab. You get an on-screen display with active grid lines that let you pinpoint the trailer hitch—with a clear view of the rear each time you shift into Reverse.

AVAILABLE TRAILER TOW MIRRORS. These large 7 x II-inch mirrors swing out on extended arms and capture the entire scene on each side of the truck. Towing an extra-wide trailer? Our Trailer Tow Mirrors are designed to give you the maximum view behind you.

AVAILABLE TRAILER BRAKE. Custom-designed to give you supreme control and confidence while trailering, the available **Trailer Tow Mirrors and Brake Group** puts it all together. The Group includes an electronic trailer brake controller, a Class IV hitch receiver and the Trailer Tow Mirrors, described above. The **Trailer and Traction Group** (available for Ram I500 SLT models only) offers all the amenities of the Trailer Tow Mirrors and Brake Group, and adds a 3.92 axle ratio (with the HEMI® V8 or EcoDiesel V6 engines), or a 3.55 axle ratio (if equipped with the Pentastar<sup>®</sup> V6 engine).

# HIT THE ROAD.

# SUSPENDS IT ALL. EXCEPT BELIEF.

# AVAILABLE ACTIVE-LEVEL<sup>™</sup> FOUR-CORNER AIR SUSPENSION SYSTEM.

WHAT'S UNBELIEVABLE IS THAT NO ONE ELSE HAS ENGINEERING THIS REFINED. This available and class-exclusive<sup>[6]</sup> suspension system delivers five distinctive operational modes, with four-corner control resulting in an overall superior ride, irrespective of load. The engineering automatically equalizes your Ram 1500 while under heavy payloads, helping maintain a horizontal load plane, a level and constant driving profile and proper headlamp-to-road angle for consistently even forward illumination.

FINGERTIP SUSPENSION CONTROL. Our integrated switch bank makes operating the available Active-Level Four-Corner Air Suspension System a snap; push a button, and you've moved from one mode to another, ensuring the ideal ride height for your terrain and conditions.

AVAILABLE PREMIUM KEYLESS ENTER 'N GO™ Functions include keyless (bladeless) operation to system controls for the Remote Start, the AllSecure<sup>®</sup> Locking System and the panic button; it even allows remote access of the Entry/Exit Mode of the available Active-Level Four-Corner Air Suspension System.

OFF-ROAD 2 MODE +2.0 in

 • OFF-ROAD 2 MODE. Provides impressive ground clearance for the path and trail and generous angles for approach, departure and breakover.
 Difference from Normal: +2.0 in.

 • OFF-ROAD I MODE. Enjoy outstanding ride balance, with an extra degree of clearance when off-road scenarios are less severe than those that warrant Off-Road 2 Mode. Difference from Normal: +1.2 in, front; +0.9 in, rear.

NORMAL RIDE HEIGHT. The most comfortable balance of ride and handling for everyday driving.

- AERO MODE. At highway speeds, the Aero Mode automatically lowers the vehicle, reducing aerodynamic drag and "body roll," and measurably improving fuel efficiency.
   Difference from Normal: -0.6 in.
- ENTRY/EXIT MODE. Automatically lowers the vehicle for easier entry/exit, loading/unloading, trailer hooking/unhooking. This mode is manually controlled by the internal button bank or remotely with the key fob. Difference from Normal: -2.1 in, front; -1.7 in, rear.

# THIS IS THE STORY OF RAM LEADERSHIP.

# SOME STRENGTHS YOU COUNT. OTHERS YOU

WEIGH. So measure it all: Ram 1500 frequently comes out on top. With class-exclusive<sup>[6]</sup> suspensions culminating in the available Active-Level<sup>TM</sup> Four-Corner Air Suspension System. With a frame that builds on advanced highstrength steel and tough crossmembers. Ram 1500 advantages range from the available Active Grille Shutters in front to a structural rear bumper to an available factoryinstalled Class IV hitch receiver that bolts directly to the frame. After your review of what's here, there's more. Click over to RAMTRUCKS.COM

**THE CONNECTION.** Your trailer connector is easily accessible, with a separate adjacent lamp for easy connecting at night. All Ram 1500 models provide a 4- and 7-pin connector.

WHEEL-TO-WHEEL SIDE STEPS. These available robust, tubular. wheel-to-wheel side steps help improve aerodynamic efficiency, while easing access to the truck interior and bed.

THE FRONT SUSPENSION. The 2016 Ram 1500 utilizes superb technology: our short-/long-arm suspension with coil springs and stabilizer bar minimizes camber and toe change. You'll measure it in the savings that accompany reduced tire wear.

THE STEEL. Reducing weight contributes to fuel efficiency. Where heavy steel isn't needed, Ram 1500 engineers opted for down-gauged but stronger steel, so you can count on a full-size tough truck with fuelsipping performance.

THE TOW. Look at Ram 1500, and you're looking at towing. This structural rear bumper is rated for Class III towing, and easily handles trailers up to 5,000 lb when properly equipped. The available factory-installed Class IV hitch receiver bolts directly to the high-strength steel frame and handles up to 10,640 lb when properly equipped.

THE SHOCK ABSORBERS. Ram I500 engineering leaves no stone unturned-except the ones you're riding on. These shocks are tuned for optimum ride balance, with more resistance during upward wheel motion than downward. Count on a smooth ride with reduced harshness, notably on less-than-perfect road surfaces.

TONNEAU COVER. Built with efficiency in mind, the available tonneau cover facilitates movement of air over the bed. This has a positive effect on airflow and helps to further reduce aerodynamic drag.

**AVAILABLE SPRAY-IN BEDLINER.** Factory-installed for ideal finish, with the durability to help protect your Ram 1500 for years to come. (Not shown.)

# NEW LED BED LIGHTING. NO MORE LOOKING IN THE DARK.

New for 2016 Ram 1500: available LED Bed Lighting that welcomes working at night and eliminates adjusting a tonneau cover. Installed right at the factory, this convenient lighting augments the CHMSL-mounted lamp to illuminate the rear area of the cargo bed. With multiple controls-either from the instrument panel-mounted switch or a button on the remote key fob-you have ample illumination on each side of the cargo bed that makes loading and unloading during dark hours easier than ever.

THE CLASS-EXCLUSIVE<sup>[6]</sup> MULTILINK COIL SPRING REAR SUSPENSION. Without exception, the competition employs leaf-spring technology. Leave it where it belongs—behind you. The Ram 1500 coil spring rear suspension offers the strength and durability the competition just can't match, with more lateral stiffness, greater vehicle control and ride quality so good, it's the preferred suspension technology for rail cars.

THE FRONT FRAME UNIT. Working with the highstrength steel frame are eight ultra-tough crossmembers; we also employ a hydroformed tubular front frame unit, also comprised of high-strength steel. It's an ultra-stiff component that further reduces weight-adding to fuel efficiency while providing exceptional ride characteristics.

THE AERODYNAMICS. Contributing to the fuel-efficient performance and quiet ride, are exceptional aerodynamics. With touches like wind-tunnel tested and thoroughly refined windshield shapes and aero-formed side mirrors, the Ram 1500 exterior is sculpted to glide through air.

THE ACTIVE GRILLE SHUTTERS. This available asset has proven itself beyond doubt. The shutters instantly adapt to speed, load and engine needs to provide ideal engine cooling, while significantly reducing aerodynamic drag to help improve the fuel efficiency for Ram 1500 models.

# ROOM WITH A VIEW.

# REFINEMENT WHERE YOU MOST EXPECT IT.

CELIN

ALER E-PRO

**LIFE IS GOOD WHEN YOU'RE IN THE BLACK.** Step in, and step up. The Ram 1500 Limited, with its all-Black leather interior, makes a powerful statement of how understated luxury can be. This top-of-the-line Ram comes with virtually every imaginable feature, including a heated steering wheel, full-color display, navigation, the class-exclusive<sup>[6]</sup> Active-Level<sup>TM</sup> Four-Corner Air Suspension System, and much, much more.

LARAMIE LONGHORN

THIS CRAFT IS TRULY EXCEPTIONAL. The very singular Ram 1500 Laramie Longhorn: a crafted interior matched only by its stunning two-tone exterior. Inside, look for European burl wood accents. Beautifully etched leather. Heated and ventilated seats. Telematics and electronics that set the benchmark. What really makes a lasting impression is the modern instrumentation that nonetheless harks back to venerable silver watches and the Old West.

# 

**ITS VERY NAME DEFIES CONVENTION.** The standards for this customized Ram 1500 take a new tack. Think spacious Crew Cab with an interior that features a unique "tire-tread" embossed treatment on the two-tone seats. Outside, look for an aggressive Ram centric grille and tailgate. The ride: standard Active-Level<sup>TM</sup> Four-Corner Air Suspension System with a one-inch ride height increase. Power: 3.6L Pentastar<sup>®</sup> V6 (standard on 4x4 models) and 5.7L HEMI<sup>®</sup> V8 (standard, 4x2; available on 4x4). The final touches are the 17-inch wheels and huge 33-inch Toyo<sup>®</sup> Open Country tires.

# RAMBOX CARGO MANAGEMENT SYSTEM

The multi-purpose cargo bed extender/divider gives you expanded versatility for any items you're planning to haul. With the tailgate open, it can be mounted to extend the storage area while still keeping things secure. It can also be moved throughout the bed to act as a cargo divider and conveniently stores at the front of the bed when not in use.

The RamBox System bins greatly broaden cargo-carrying capability and convenience. Add any of the numerous available Authentic Accessories from Mopar₀—like this RamBox Cargo Organizer—and it's clear why Ram I500 is the go-to truck for storage and functionality.

# THE AVAILABLE CLASS-EXCLUSIVE® RAMBOX CARGO

**MANAGEMENT SYSTEM.** Make your Ram 1500 stand out in every field. The ingenious RamBox System starts with two large, drainable, illuminated and lockable bed-side storage bins for everything from tools to sports equipment. The comprehensive system also includes a cargo bed extender/ divider, cargo bed rails with four adjustable tie-down cleats, and, for 2016, the new LED Bed Lighting. It's factory-installed on Ram 1500 models with 5'7" and 6'4" beds—and is engineered to leave room for standard sheets of building materials.

Tie-down points merely start the story of capability offered by the RamBox System cleats. Movable along the bed-side rails, you can adjust each cleat to correctly—and securely—lock in your cargo.

# CUSTON-MINDED

Ram I500 Outdoorsman<sup>®</sup> in True Blue Pearl with available Mopar<sub>®</sub> accessories, including Heavy-Duty Splash Guards, Black Tubular Side Steps, Bed Step and 20-Inch Black Forged Wheels.

# CUSTOMIZE YOUR RAM 1500.

Authentic Ram Parts and Accessories by Mopar go far beyond simply giving you a means to personalize your Ram 1500; they give you nearly unlimited potential to ramp up comfort, convenience and performance.

Mopar Accessories cover it all. You can enhance towing capability, ease getting in or out, select from a variety of protective devices and add flair to both the interior and exterior. Conceived and engineered by the same experts who designed your Ram truck, you're assured of perfect fit, function and finish.

Further advantages of Mopar are wide-ranging. Mopar Express Lane Service minimizes waiting and downtime. The Mopar Vehicle Protection® Plan is the only extended protection backed by the manufacturer. The online recordkeeping of your service records are a click away, through our Mopar Owner Connect Web site—and it's also where you'll get additional vehicle information and exclusive moneysaving offers as a preferred Ram owner.

Mopar support. It's all about keeping you happy and keeping your Ram 1500 in top-notch looks and condition. Check it out at **MOPAR.COM**

Numbers in **Black boxes** reflect max ratings. 1. Payload and Max Trailer Weights are estimated values. 2. All weights are shown in Ib unless otherwise stated. 3. Payload and Max Trailer Weight are calculated as specified in SAE J2807. 6. Payload and Trailer Weight Rating are mutually exclusive. 7. GAWRs, GVWRs and GCWRs should never be exceeded. 8. The recommended tongue weight for a conventional hitch is 10 percent of the gross trailer weight. The maximum tongue weight of Class IV hitch receiver is limited to 1,100 lb. 9. Weight-distributing hitch is recommended for trailers over 5,000 lb.
